English/Language Arts/Reading: In ELAR, we are focusing on expository reading using science and narrative reading using Storyworks, library books, and poetry. We are differentiating by allowing students to choose the activity they would like to complete once they have read an article or book.

Math: In math students will continue to review and strengthen their 5th grade math skills through a variety of in-class projects. After that, students will spend the final two weeks of fifth grade preparing for sixth grade by completing the Stepping Up to Grade 6 unit in the Pearson textbook.

Science: We are finishing up our unit on Earth, Moon and Sun Systems and beginning to review for our upcoming Science STAAR on May 11. We are blitzing key vocabulary and questions and students have Science homework! This week and next we are focusing on Earth Science and Matter and Energy.

Social Studies: We are continuing our look into the Civil War. We will be studying the events leading to the Civil War, battles and strategies, and life during the war.
