What's Happening in 5th Grade?

English/Language Arts/Reading: In ELAR we will be analyzing elements of plot by focusing on the tone and mood of a story or poem. We will also begin our adventure in writing our personal narratives by adding our own elements of tone and mood to our stories.

Math: In math we are wrapping up addition and subtraction of whole numbers and decimals and moving onto multiplication of whole numbers and decimals. This will include multiplying a three-digit number by a two-digit using the standard algorithm. We will also represent multiplication of decimals with products to the hundredths using models as well as the standard algorithm.

Science: We will be wrapping up our Earth Science Unit by learning about Alternative Energy Resources, Properties of Soil, and Rapid Changes to the Earth's Surface.

Social Studies: In social studies, we will be learning about the benefits of our Free Enterprise system in America. We will explore factors that effect supply and demand in the market place.
